

# Vibes Account Manager

Last Updated: Monday, January 29, 2018

When working with Vibes APIs or Integration/Batch files, contact your Vibes account manager for help with the following:

- **API Key** – Your Vibes account manager can help you with your API Key when you create an Acquisition Campaign in the Vibes Platform. The API Key is found at the top of the Campaign page.
- **Company ID** – To get your company ID, please contact your Vibes account manager.
- **Event Triggered Message** – You need to work with your Vibes account manager to help you pre-configure any message content. You also need to define the event data ahead of time.
- **SFTP** – The use of integration files requires a Vibes' Secure File Transfer Protocol (SFTP) account. Contact your Vibes account manager to get your SFTP account set up.
