

Wallet Instance Extract

Last Updated: Monday, November 18, 2019

The daily Wallet Instance extract is used to sync Wallet data between Vibes Mobile Engagement Platform and a Customer Relationship Management (CRM) or Campaign Management system. It will contain all of the Wallet instances that have been registered or unregistered since the last data extract.

File Name

walletInstance_YYYY-MM-DD.txt

Tab Delimited Files

Extract files will have each column delimited by a tab, as well as each record delimited by a line feed.

Contents of Each File

Each file will contain the Subscription activity for each day. The following scenarios will be represented in the following manner:

If wallet object is registered on 4/5/2017

wallet_instance_uid	instance_event	registered_at	unregistered_at	wallet_object_uid	wallet_provider	platform	company_id	campaign_uic
111b2c1234d1e1234567f123456789abcdefghijk123456	registered	2017-04-05 14:30:00 UTC		AB123B23-45CA-56D1-EF7G-HIJK89012BZ	Pass	iOS	A2bc3dFg	z1a2a-123a

If wallet object is registered and unregistered on 4/5/2017

wallet_instance_uid	instance_event	registered_at	unregistered_at	wallet_object_uid	wallet_provider	platform	company_id	campaign_uic
111b2c1234d1e1234567f123456789abcdefghijk123456	unregistered	2017-04-05 14:30:00 UTC	2017-04-05 15:30:00 UTC	AB123B23-45CA-56D1-EF7G-HIJK89012BZ	Pass	iOS	A2bc3dFg	z1a2a-123a

If wallet object is registered and unregistered on 4/5/2017 and the same object is registered again on 4/5/2017

wallet_instance_uid	instance_event	registered_at	unregistered_at	wallet_object_uid	wallet_provider	platform	company_id	campaign_uic
111b2c1234d1e1234567f123456789abcdefghijk123456	unregistered	2017-04-05 14:30:00 UTC	2017-04-05 15:30:00 UTC	AB123B23-45CA-56D1-EF7G-HIJK89012BZ	Pass	iOS	A2bc3dFg	z1a2a-123a
111b2c1234d1e1234567f123456789abcdefghijk123456	registered	2017-04-05 16:30:00 UTC		AB123B23-45CA-56D1-EF7G-HIJK89012BZ	Pass	iOS	A2bc3dFg	z1a2a-123a

File Body

The file body can contain the following fields as data, separated by the delimiter and a header row.

Field Name	Data Type	Description
wallet_instance_uid	String	Unique Vibes-specific Identifier for each Wallet instance that's been installed.
instance_event	String	Type of Wallet instance event. Valid values: Registered and Unregistered .
registered_at	Date /Time	The Date/Time when the Wallet object was installed. Format example: "2017-04-05 14:30:00 UTC".
unregistered_at	Date /Time	Date/Time when the Wallet object was uninstalled. Format example: "2017-04-05 14:30:00 UTC".
wallet_object_uid	String	Unique identifier for the Wallet object of this instance.

wallet_provider	String	String name for the installed provider. Valid values are Pass and Wallet .
platform	String	String for the specified device platform. Example: 'Android 7.1.1', 'iOS 10.3', and so on.
company_id	String	Unique string representing the Vibes Company account.
campaign_uid	String	Global Unique ID representing the campaign at Vibes.
uuid	String	This is a campaign-specific identifier that is used to identify Wallet objects. This is generally customer defined, as it can be included in links and used before a Wallet object is actually created. <div style="border: 1px solid #ffc107; padding: 5px; margin-top: 10px;">  Note: uuid = wallet_item_id. </div>
current_flag	Boolean	It is True if the instance is currently registered, or False if the instance has been unregistered.
shared_instance	Boolean	It is False if this the first installed instance for the Wallet object, or True otherwise.
