

Incentive Code Issuance API Methods

Last Updated: Tuesday, June 15, 2021

Available API methods

- [Get Issuances for an Incentive Code](#)
- [Issue an Incentive Code](#)

An Incentive Code Issuance entity is a record of an issuance of an Incentive Code.

Get Issuances for an Incentive Code

```
GET /companies/:company_id/incentives/codes/:code/issuances
```

Response

An array of all Issuances for the given code.

Issue an Incentive Code

```
POST /companies/:company_id/incentives/pools/:pool_id/issuances
{
  "external_issuee_id": "312",
  "code": "aabb-ccdd",
  "referring_application": "system",
  "referring_application_ref_id" : "1234"
}
```

Request Elements

Data Element	Required	Description
external_issuee_id	No	Unique external issuee ID.
code	No	If provided, a specific code is issued.
referring_application	Only in pools requiring a <i>campaign_registration</i> .	Application issuing the code.
referring_application_ref_id	Only in pools requiring a <i>campaign_registration</i> .	Application reference ID.

Response

It returns an Issuance entity if there was an available code.

Note: An *HTTP error code 422* is returned if there are not enough available codes to issue.

Code Issuance

The same code is issued when using the same *issuee_id*. An Issuance entity is created after each successful Issuance request.
